STREAMLINE YOUR INSTRUCTIONAL MATERIAL MANAGEMENT

Simplify your inventory processes and ensure students and teachers have the materials needed to succeed.

With TIPWeb-IM, districts can track and manage print and digital instructional materials in a cloud-based system built specifically for the needs of K-12 school districts. By gaining control over your inventory data, you can ensure your district has the instructional materials needed for effective teaching and learning. TIPWeb-IM makes it simple to understand district and campus inventory needs and availability so you can accurately order, distribute, and audit materials. As a result, you'll reduce textbook losses, hold students and staff accountable, and save money. Best of all, TIPWeb-IM streamlines your workflow by eliminating manual data-entry, paper processes, and information silos.

TIPWeb-IM Empowers You To:

- Easily manage the distribution and collection of large quantities of instructional materials.
- Ensure campuses have the correct quantities of materials needed based on course enrollment numbers calculated automatically with an SIS integration.
- Maximize existing resources by easily identifying and transferring unused materials.
- Reduce textbook losses and replacement costs by holding individuals and campuses accountable.
- Speed up inventory audits with barcode scanners and by logging inventory by quantity.
- Streamline processes and create district-wide consistency to improve data accuracy.

"With TIPWeb-IM, we have seen a huge improvement in overall campus accountability. Campuses have stopped over-requesting materials and hoarding books because we're able to respond to their requests quicker and more accurately."

April Hammock, *Instructional Material Supervisor, Virginia Beach City Public Schools (VA)*

Features That Meet the Unique Needs of School Districts.

Track unlimited textbooks, teacher editions, digital licenses, consumables, resource kits, and more.

Issue inventory to students and staff, assess charges, and generate electronic notifications and receipts.

Identify surplus inventory and shortages across the district and redistribute materials accordingly.

Electronically receive, manage, and approve **transfer requests** from campuses.

Quickly view dashboards showing the total quantity and value of inventory at a campus or across the district.

Customize TIPWeb-IM for your district's needs. Options include:

Labels & Scanners:

Maximize the benefits of TIPWeb-IM by labeling your materials with barcodes and using handheld scanners to complete the inventory processes. You'll see immediate workflow improvements, including a reduction in manual data entry and improved accuracy. Hayes will partner with you to select the scanners and labels that will perform best in your district.

SIS Integration:

Automate the flow of data between TIPWeb-IM and your Student Information System to reduce manual data entry as students move between grade levels or locations. View enrollment and schedule information directly in TIPWeb-IM to instantly know how many titles are needed at each campus.

Reduce Textbook Losses By Up To 50%

Year 1: **15%** Reduction

Year 2: **40%** Reduction

Year 3 and beyond: **50%** Reduction

About Hayes Software Systems:

For nearly 30 years, Hayes has empowered school administrators to make confident, data-driven decisions with products and services built for the unique needs of K-12. Used in over 8,000 schools, including 35 of the largest 100 districts in the country, Hayes's solutions impact over 8,000,000 students.
