HAYES Software Systems

STS education

Remove the **roadblocks.**

- **Maximize existing resources**
- **Minimize the cost of replacing lost assets**
- **More accurately forecast for future purchases**
- **Ensure staff and students have access to the materials needed to success**
- **Respond with reliable data**

TIPWeb IT

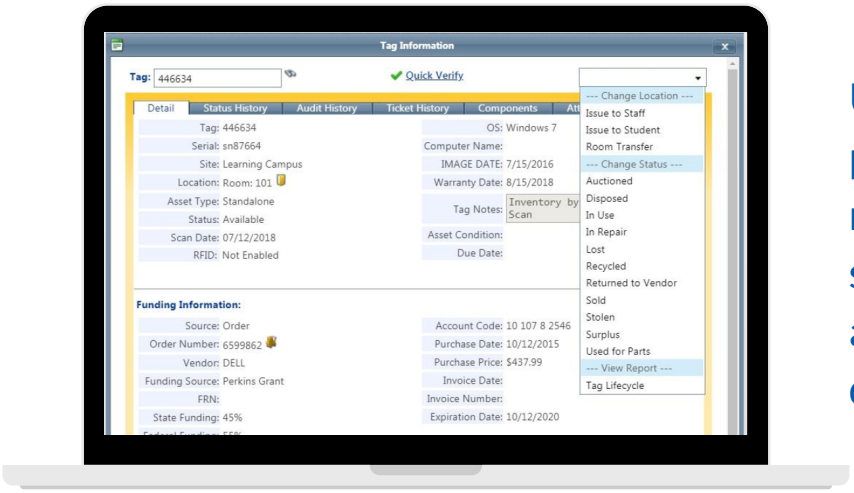
TIPWeb-IT is the easy-to-use, fully automated online solution for asset inventory.

- Simplify audits and track devices that require special funding compliance
- Give administrators complete control of inventory records
- Assign devices to staff & students for their 1:1 initiative
- Integrate seamlessly with your SIS and HR systems to eliminate duplicate data entry, and synchronize information

GetHelp

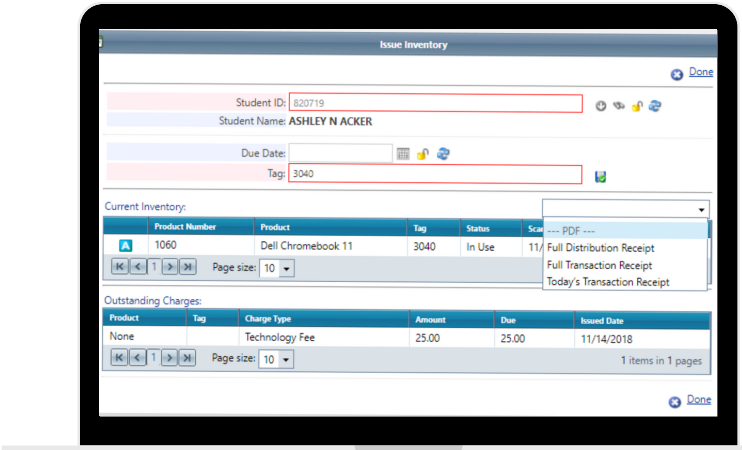
GetHelp is the integrated help desk system for managing the use, availability, and health of a districts' assets.

- Enable streamlined support services and efficiently manage help desk tickets
- Create a Knowledge Base to reduce ticket volume and empower customers to resolve issues independently
- Run dynamic reports that identify bottlenecks and streamline workflows with GetHelp Analytics



Use **TIPWeb-IT** to track assets purchased with **BOCES** funding and reimbursements, comply with specific reporting requirements, and measure asset value and depreciation.

TIPWeb-IT provides data integration options with the district's student management system and human resources software to manage the assignment of devices to students and staff.



Manage **unlimited assets**, track **mandatory funding compliance**, report asset **depreciation**, and **simplify** your staff and student **1:1 initiatives** with easy device assignment. Unlimited user access supports cross-department roles and responsibilities to ensure accurate data.

Contact your **STS representative about how you can save your district time**, **money**, and **resources**.
