

## STREAMLINE YOUR INVENTORY AUDITS WITH TIPWeb-IT with RFID

Complete audits 20% faster with RFID.

TIPWeb-IT with RFID is an inventory control solution designed to make your inventory audits easier, faster, and more accurate. Save hours of time by scanning multiple items simultaneously, helping to reduce the stress and frustration associated with conducting inventory audits. RFID tags can be read from several feet away, without the need for line of sight. Consider the convenience of inventorying projectors mounted to the ceiling, stacks of laptops in storage, or routers and switches overhead just by being in the same room with them.

### RFID Saves You Time By:

- ✓ **Reading multiple RFID tags simultaneously** to eliminate the need to physically scan each asset, like every laptop or tablet in a cart.
- ✓ **Eliminating the need for line-of-sight** to quickly inventory hard-to-reach assets like projectors and network equipment.
- ✓ **Speeding up the inventory-taking process** to conduct audits in hours instead of days and with one employee instead of an entire team.

### Did You Know?

Research shows that RFID results in:

**20% reduction** in labor-intensive processes

**25% increase** in usage of underutilized inventory

## How RFID Works:

RFID incorporates a specialized reader which transmits and receives radio waves to communicate with the RFID tags applied to your devices.

## What you need to get started with RFID:

1. Assets cataloged in the TIPWeb-IT asset management system
2. A handheld RFID mobile scanner to perform inventory
3. RFID recognition software installed on the scanner and TIPWeb-IT
4. UHF Passive RFID tags: unique asset identifier affixed to assets

## Hayes Supports Your RFID Implementation with:

- A **site survey** to determine best tactics for implementation and recommendations on appropriate RFID tag types
- Customized **on-site training** to ensure your team is prepared to work efficiently
- A **prototype roll-out** of technology to mitigate risk before a district-wide rollout

## What is TIPWeb-IT?

**An asset management system that empowers you to work smarter** by efficiently managing district and campus inventory in a single solution. Eliminate repetitive manual data entry, tedious paper processes, and information silos with a cloud-based software that was built specifically for the needs of K-12 school districts. Tracking and managing inventory data in TIPWeb-IT makes it easy to report what you own, where it's located, and how it's being used.

## About Hayes Software Systems:

For nearly 30 years, Hayes has empowered school administrators to make confident, data-driven decisions with products and services built for the unique needs of K-12. Used in over 7,700 schools, including 34 of the largest 100 districts in the country, Hayes's solutions impact over 8,000,000 students.

Our clients tell us they choose to partner with our company because we make inventory management simple, easy to use, and optimized for educational institutions. We are dedicated to the success of our clients and provide a dedicated customer success team and unlimited technical support.
